

PsychSupport

Anonymous Mental Health Support at Your Fingertips

We are building a secure, stigma-free space designed to help students navigate emotional crises and daily academic pressure. Our fully functional MVP prototype is ready for rapid university deployment — meeting students exactly where they are, when they need us most.

ANONYMOUS

SECURE

RIGHT NOW

Less stress, more support. Anonymous. Secure. Right now.

Why Do Students Suffer in Silence?

Over **60% of students** report severe academic stress, yet the vast majority don't know where to safely seek help. The barriers are systemic — and they are solvable.

Shame & Stigma

Fear of judgment from peers, professors, and future employers prevents students from reaching out — even when they desperately need support.

Bureaucratic Red Tape

Overcomplicated registration processes and weeks-long waiting lists at traditional university clinics leave students without timely help.

No On-Demand Help

Panic attacks and emotional crises don't wait for an appointment scheduled two weeks in advance. Students need support in the moment.

PsychSupport — Breaking Down the Barriers to Mental Healthcare

PsychSupport is designed around one core principle: **minimize friction, maximize access**. Every design decision removes a barrier between a student in crisis and the support they need.

Low-Barrier Design

Zero administrative hurdles. Support is available the moment a student needs it — no forms, no waiting, no judgment.

Privacy-First Engineering

Full GDPR compliance with absolute user control over cookies and tracking from the very first second of interaction.

Dual-Access Architecture

Quick Help — Guest Mode

Instant access to coping tools without providing any personal data. No account, no email, no barriers.

Full Support — Registered Student

A secure personal portal for scheduling therapy sessions, live chat with certified therapists, and premium resources.

The Anonymous Guest Journey

Instant Coping Tools with Zero Digital Footprint

01

Frictionless Onboarding

With a single tap, the system generates a random, volatile identifier (e.g., **ANON-EB844884**). No account creation, no email, no phone number required.

02

Zero Footprints

No names, no emails, no phone numbers, and no IP-to-identity logging. Students can explore freely without leaving a trace.

03

Immediate Coping Tools

A curated, interactive grid of science-backed calming exercises — plus instant access to the Emergency Protocol (SOS) — available from the first screen.

Access for Verified Students

Unlocking Advanced Therapeutic Features — Safely

Students who are ready for deeper support can register using a valid university domain email and Student ID. This clean verification funnel prevents platform abuse while preserving a dignified, streamlined experience.

Smart Calendar

Frictionless booking and schedule management for sessions with university psychologists. No phone calls, no waiting on hold.

Anonymous Live Chat

A direct, secure, and encrypted text line to certified therapists. Students can seek professional guidance without revealing their identity until they're ready.

Knowledge Hub

Access to premium self-help articles, evidence-based guides, and curated mental health resources — available anytime, anywhere.

Sleep

Sleep Hygiene for Better Mental Health

🕒 5 min read

Quality sleep is foundational to mental health. Poor sleep can worsen anxiety, depression, and stress, while good sleep can enhance mood, concentration, and overall well-being.

The Sleep-Mental Health Connection:

During sleep, your brain processes emotions and consolidates memories. Lack of sleep impairs this process, making it harder to regulate emotions and think clearly.

Tips for Better Sleep:

Create a Sleep-Friendly Environment:

- Keep your room cool (65-68°F / 18-20°C)
- Use blackout curtains or an eye mask
- Minimize noise or use white noise
- Reserve your bed for sleep only

Establish a Routine:

- Go to bed and wake up at consistent times
- Create a relaxing pre-sleep routine
- Avoid screens 1 hour before bed

The Emergency Protocol (SOS)

Safety Is Not a Feature — It Is Our Core Foundation

Always-On SOS Button

Visually prominent and accessible in the sidebar at all times — regardless of login state. A student in crisis never has to search for help.

One-Click Activation

Instantly triggers an intuitive, high-contrast emergency screen designed for clarity under extreme distress. No navigation, no confusion.

Immediate Lifelines

Click-to-call buttons for national mental health hotlines (**116 123**) and emergency services (**112**). Text-based support via SMS ("HOME" to 741741).

Compassionate Reinforcement

Reassuring, clinically informed copywriting normalizes the crisis state — reminding students they are not alone and that help is available.

Emergency Protocol Activated

If you are in immediate danger or crisis, please reach out for help immediately.

Crisis Hotline
116 123

Call Now

Additional Emergency Contacts:

- Emergency Services: **112**
- University Counseling: Contact your institution
- Text Support: Text HOME to 741741

You are not alone. Help is available 24/7. Your feelings are valid, and reaching out for support is a sign of strength.

Close

Example Scenario

- The user activates the “Call Now” feature to contact the 116 123 crisis hotline.
- A trained crisis counselor answers and introduces themselves.
- The counselor asks about the user’s emotional state and what prompted the call.
- The user reports suicidal thoughts and fear of self-harm.
- The counselor remains calm and provides supportive, grounding communication.
- They assess the level of immediate risk through targeted questions.
- The counselor determines there may be an imminent risk of self-harm.
- They initiate escalation procedures, including contacting emergency services (112) if needed.
- The counselor stays on the line to provide continuous support during the response.
- After stabilization, the user is encouraged to seek ongoing professional mental health support.

Emergency Protocol Activated

If you are in immediate danger or crisis, please reach out for help immediately.

Made with **GAMMA**

Enterprise-Grade Privacy & Security

Built on Trust and Modern Tech Standards

Student trust is our most critical asset. PsychSupport is engineered so that privacy is not a policy — it is the architecture.

End-to-End Chat Encryption (E2EE)

Conversations between students and therapists are encrypted client-side. **Even our database cannot read them.** Privacy is mathematically guaranteed.

Transparent GDPR Compliance

Granular cookie preferences with full user control. Rejecting non-essential cookies *never* limits access to core self-help features.

Data Segregation Architecture

Identity Layer

Student names and IDs are stored in a completely isolated system — never linked to clinical data.

Clinical Layer

Session bookings and therapy chats exist in a separate, encrypted environment with no identity pointers.

Consent Layer

Students control what is shared, with whom, and for how long — with clear, plain-language controls.

Roadmap & Future Vision

Scalability from a Single Campus to a Nationwide Standard

Phase 1 — Current MVP

Fully realized frontend UI/UX with integrated consent management, interactive breathing exercises, and the SOS emergency framework. Ready for pilot deployment.

1

2

Phase 2 — Immediate Horizon

Deep API integration with student management systems (e.g., USOS via OAuth 2.0) for instant, automated enrollment verification — removing the last friction point.

3

Phase 3 — AI Enrichment

Privacy-safe, on-device AI sentiment analysis to detect crisis states in chat text and proactively suggest physiological coping exercises — without ever transmitting data to a server.

 Each phase is designed to scale responsibly — growing with institutional trust while never compromising the privacy-first foundation that makes PsychSupport different.

Empowering the Next Generation with Modern Mental Health Tech

PsychSupport is a modern, digital-first tool that bridges the critical gap in current university counseling services. We bring extreme accessibility, robust security, and an absolute focus on user privacy to an ecosystem that desperately needs innovation.

Extreme Accessibility Help available in seconds, not weeks. Anonymous or registered — students choose their path.	Robust Security Enterprise-grade encryption and data segregation. Student trust is our architecture, not our marketing.	Privacy by Design GDPR-compliant, consent-driven, and built to give students full control over their data and identity.
--	---	---

Our question to you: Are we ready to build a safer, healthier, and more supportive academic environment together?

Thank you for your time. We are open to your questions.

Meet Our Team

Joanna Joniec

Leads the overall project vision and helps shape PsychSupport into a clear, student-centered solution. She focuses on aligning the product with user needs and the broader mission of accessible mental health support.

Marcin Gronek

Supports the technical development and implementation of the platform. He contributes to building a secure, reliable experience that reinforces trust and privacy for students.

Szymon Gustek

Contributes to product design and communication, helping translate complex ideas into a simple and accessible user experience. He supports the team in presenting PsychSupport in a professional and compelling way.
